

Environmental Policy

Magnum Materials Ltd are committed to protecting the local environment and local community through the implementation of environmental objectives. The company strives to promote sustainability wherever practicable through continuous improvement and pollution prevention. Magnum Materials will:

1. Improve environmental performance with compliance to legislation as the minimum.
2. Minimise waste throughout the company by increasing staff awareness.
3. Encourage a reduction in consumption and improve the utilisation of raw materials and self-adhesives.
4. Review energy usage within the site.
5. When purchasing new equipment consider the energy rating and environmental performance.
6. Increase the use of recycled paper and encourage staff to re-use paper wherever possible.
7. Review environmental improvements within the label printing industry.
8. Conduct annual environmental assessments to ensure compliance with legislation and environmental performance.
9. Ensure that the policy is implemented and understood at all levels and by all members of staff.
10. To introduce eco-friendly products within our range of products where possible.

Signed

Stuart Botterman
