## REACH Statement

Registration, Evaluation, Authorisation and restriction of Chemicals (REACH) became law on December 18, 2006, to streamline and improve the former legislative framework on chemicals of the European Union (EU). REACH places greater responsibility on industry to manage the risks that chemicals may pose to health and the environment. REACH applies to most common substances used in our day-to-day life.

As Magnum is not a manufacturer or distributor of chemical substances we are regarded as a downstream user. This means that we are not required to register our products for REACH standards.

Magnum continue to monitor the registration of those substances by our suppliers and are able to confirm that the majority of our products do not knowingly contain in a concentration above 0.1% weight by weight (w/w) any SVHC in the Candidate list published by European Chemicals Agency (ECHA) or Annex XIV of the REACH regulation (1907/2006/EC) – including the list updated 19<sup>th</sup> January 2021.

The exceptions to the above are as follows:

Product Code	Description	SVHC substance CAS number	Substance name
SDVP	Self Destruct Satin White Vinyl Perm TT	25154-52-3	Nonylphenol in face stock
TPPVS	T Evident Bright Silver Polyester S/Void / 066	6147-53-1	Cobalt (II) acetate Tetrahydrate in face stock

If we are notified of any issues that might affect any of our products, we will update our REACH Statement which will be available on our website [www.magnum-uk.com](http://www.magnum-uk.com).
